Grow with Eos-Ice Beauty

More and more people desire to have permanent hair reduction. They want a treatment that is effective, fast and comfortable.

To meet these needs, we PZ Laser, a leader in laser industry, developed the Eos-Ice Beauty so you can:

Grow with **Eos-Ice Beauty**

Benefit from a rapid return on **investment**

Increase your **patient satisfaction**

Build up your **clinic prestige**

Grow your **business**

In order to provide you with optimal treatment possibilities, the portable Eos-Ice Beauty comes with:

- The "Gold Standard" 808nm diode laser
- Unique Built-in Japan Semi-conductor cooling
- Up to 20Hz Repetition
- Intuitive software with preset parameters and professional mode

The unique features of the Eos-Ice Beauty, enable you to provide your patients with:

- Short treatment time
- Maximal treatment comfort
- Optimal results
- Skin type (I-VI) & Hair color and texture adjustable

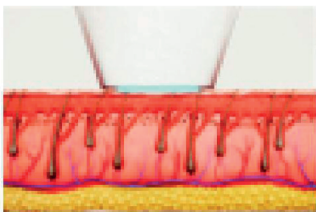

Technology behind Eos-Ice Beauty

PZ LASER 808nm Laser hair removal machine is the process of removing unwanted hair by means of exposure to pulses of laser light 808nm that destroys the hair follicle.

The lasers damage the chromospheres by selectively heating them while leaving surrounding tissue unharmed. When treating unwanted hair, for example, the melanin in the hair follicles is targeted and damaged which results in the disruption of hair growth and regeneration. The diode laser is complemented by cooling technology and pain reducing methods which improve treatment efficacy and patient comfort.

How Eos-Ice Beauty Works

1. Skin is cooled before and during treatment

2. Skin is compressed. Laser beam applied to skin and target is damaged

Simultaneous Contact Cooling

Eos-Ice Beauty is an advanced cooling technology that cools the skin during treatment for longer periods of time. The tech cold sapphire tip minimizes the risk of burns on the skin surface while maintaining heat within the dermis where hair follicles are treated.

Contact Cooling increases patient comfort, making treatments more enjoyable than ever before.

808nm Eos-Ice DIODE LASER

For the Widest Range of Hair Types and Colors

Eos-Ice offers breakthrough hair removal technology using a diode laser based on an 808 wavelength. The powerful absorption that is possible with the 808nm wavelength combined with the contact cooling, treatment coverage, comfort and low maintenance of the diode laser provides an ideal solution for the widest range of hair types and colors.

Eos-Ice Speed

Half the treatment time with 20Hz Repetition

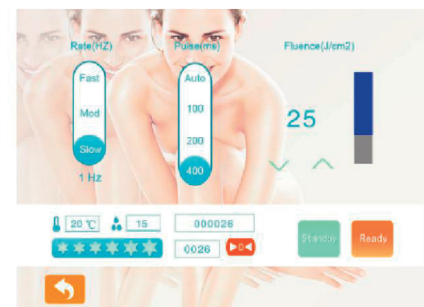

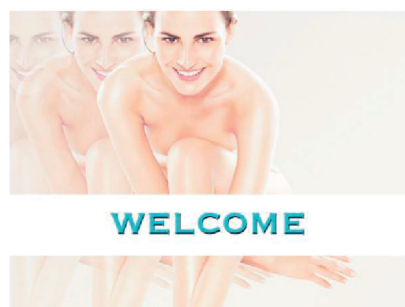

Perform more treatment sessions in less time with high energy density spot size applicator, allowing you to quickly treat larger areas, while offering your patients the fastest and most effective hair removal possible.

Compact Handpiece

1. Versatile treatment methods
2. An ergonomic and innovative lightweight Eos-Ice Beauty handpiece design
3. Make patients more comfortable and practitioners more enjoyable

Advanced Graphical Interface
Concise and beautiful Ability to
quickly grasp operation treatment

The Eos-Ice technology by PZ Laser has been validated in numerous clinical studies and peer reviewed articles.

Thousands of satisfied customers have been and are still benefiting from the golden standard performance and patient satisfaction.

"Pain-free isn't the only innovation, of course. Eos-Ice Beauty also has the fastest coverage rate in the industry, with a ergonomic 5*15 mm spot and up to 20 Hz repetition rate with very high energy density. Plus, with no consumables, Eos-ice Beauty is easy to operate and very cost-effective."

Prof. Patrick Bowler, Germany

"With the High Speed Technology, I can treat large body areas in record time. The treatment is very effective, and because of the simultaneous contact cooling technology there is no pain.

My customers love the results and recommend it to their friends. My business turnover has in-creased."

Mary Ludo, M.D

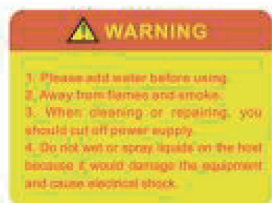

SPECIFICATION

Eos-Ice Beauty	
Control System:	10.4" TFT full Color Touch Screen
Laser Power:	500W
Laser Wavelength:	808nm
The light Guide Crystal :	Sapphire
Cooling System:	Water +Built-in Semi-Conductor +Air
Spot Size :	14*14mm
Repetition Frequency :	1~ 20HZ
Pulse Width :	10~400ms
Energy Density :	1~80j/cm2
Laser Cooling Temperature :	0 - 5 °C
Power Supply:	AC230V,50Hz, AC110V, 60Hz
Package Dimensions :	54.5cm*41cm*61cm
Net Weight:	30kg
Working Temperature:	+15°C~+30°C
Storage Temperature:	-20°C~+55°C
Relative Humidity:	≤80%

About PZ Laser Company

PZ Laser, a worldwide aesthetic device manufacturer produces high-end products for plastic surgeons, dermatologist, physicians and healthcare professionals. PZ Laser serves the industry as one of the leading companies with rigorous R&D level and valuable experience with 15 years histories. PZ Laser products are being globally marketed by overseas offices and worldwide distributors partners.
